UK CONNECT

Construction
Connectivity Solutions

Connectivity built for construction sites that can't afford to stand still.

Rapidly deployed, fully managed connectivity solutions that keep construction projects online and operational from day one. Managed by a partner you can trust.

The Issue

Construction relies on digital tools, connected teams and equipment and real-time data from day one. Robust connectivity foundations are essential and managing this at scale is challenging with different site requirements, locations and timelines.

If sites go offline, productivity drops, communication suffers, and project delivery is put at risk.

For over a decade, UK Connect has delivered fully managed internet solutions designed for construction to the UK's largest main contractors, home builders and housing associations.

Industry Challenges We Solve

Remote and temporary sites

- Lack of fixed-line infrastructure
- Day one internet
- Changing project locations
- Fast site mobilisation requirements

Growing Digital Demands

- Increased use of cloud-based applications
- Connected plant and equipment
- More IoT deployments
- Demand for real-time data

Operating at scale

- Multiple live projects
- Inconsistent internet across sites
- Limited visibility for central IT teams
- Multiple suppliers and support models

Harsh Site Conditions

- Challenging environments & terrain
- Evolving site layouts
- Steel structures impacting signal
- Reliable coverage across large sites

You don't measure good internet by signal strength.

You measure it by uptime, productivity and operational resilience on site.

What We Deliver

Fully managed solutions

5G	LEO Satellite	Reliable Indoor Mobile Coverage	Network Failover and Business Continuity
Fixed Line Internet	IoT Enablement	VoIP Telephony	Network Monitoring and Optimisation

UK CONNECT

Construction
Internet Solutions

Internet built for construction sites that can't afford to stand still.

Our Approach

A managed service that gets sites online quickly and keeps them moving

1. **Site survey and assessment**
2. **Network design and planning**
3. **Installation by highly qualified technicians**
4. **Network validation and optimisation**
5. **24/7, UK-based monitoring & support**

Why UK Connect?

A managed service provider you can trust

Rapid Deployment
We'll get you connected within ten working days. Faster than any fixed line provider.

Trusted in Challenging Environments
With over a decade of connecting remote and complex sites.

Single Managed Service
One provider, one SLA, one contract, one support team. All your sites.

World-class Customer Service
Our Net Promoter Score (NPS, 2025) of 84 reflects our commitment to exceptional customer service.

Nationwide Capability
Our Field Technicians are based nationwide. We'll get you connected wherever you operate.

UK-Based Support
24/7 Network Operations Centre operating 365 days a year, based in Farnborough.

What We Support

- Site management platforms
- CCTV and security systems
- Asset tracking solutions
- Drones and site survey technologies
- Environmental monitoring sensors
- Temporary site and sales offices
- Regional and head office connectivity
- Connected plant and equipment

Struggling with internet on site? Leave it to us.
