

In-Building Mobile Coverage

Boost your 3G, 4G & 5G signal

"Can you hear me?" Now you can...

Why is it that the signal always drops when you need to make an all-important phone call or use IoT products such as a payment machine or tablet? Modern building designs, metal site cabins and poor coverage areas could be just some of the reasons for these frustrations... Our In-Building Mobile coverage solution can help you overcome every one of these issues.

In-Building Mobile Coverage – What's it all about?

Our In-Building Mobile Coverage solution utilises 3G, 4G and 5G technology to address and resolve poor communication and cellular coverage in business, IoT, remote, residential and mobile environments.

The result? Enhanced and reliable mobile connectivity that allows you to contact staff and customers without disruption. Our In-Building Mobile Coverage easily connects to IoT services including payment machines and tablets, helping to increase revenue and support improved workforce productivity.

NO COVERAGE? NO PROBLEM

Boost mobile signal strength

No interference with other wireless products

Full UK coverage

Flexible contracts

Cost-effective

Network safe

Supports 3G/4G/5G

All networks supported
