

Amazon Leo Delivered by UK Connect

Managed. Monitored. Mission ready.

Reliable, secure, and scalable connectivity. Anywhere.

For remote and disparate operations, network disruption slows productivity, compromises security, and drives up costs. Amazon has trusted us to remove that risk.

UK Connect combines the high-performance, low-latency satellite connectivity of Amazon Leo with our dependable, fully managed, enterprise-ready service. Providing reliable connectivity, wherever you operate.

- ✓ **Up to 1 Gbps download**
- ✓ **Up to 400 Mbps upload**
- ✓ **One contract**
- ✓ **Every site**
- ✓ **24/7 NOC monitoring**
- ✓ **Connected in days**

Service you can trust

UK Connect turns Amazon Leo into a fully managed, enterprise-ready service. We've been carefully selected by Amazon to design, install, integrate, monitor, and support your satellite connectivity no matter your location.

With one contract, one SLA, and one accountable partner, you get reliable, scalable connectivity without operational burdens.

By choosing UK Connect, you also benefit from 24/7 proactive monitoring, rapid support, scalability, and predictable cost.

What's more, Amazon Leo is secure by design. Proven Amazon Web Services (AWS) infrastructure means you can quickly and easily connect your network and cloud infrastructure without any need to use public internet.

The benefits

- ✔ **Developed by Amazon**
Be reassured. Connectivity from the company that used its vast scale and engineering knowledge to bring you AWS.
- ✔ **Powered by AWS**
Traffic using Amazon Leo can be routed directly into AWS environments, providing stronger privacy and security assurances.
- ✔ **Enterprise-ready**
Guaranteed bandwidth and predictable performance, perfect for keeping large-scale and disparate operations running efficiently.
- ✔ **Scalable**
Needs change and operations expand. Amazon Leo connectivity remains dependable, removing the need for infrastructure overhauls.
- ✔ **High-performance**
Up to 1 Gbps download and 400 Mbps upload to support demanding, high-traffic operations.
- ✔ **Secure by design**
Keeping you safe with end-to-end encryption and modern security standards, including Hardware Root of Trust, IAM principles, and compliance with global security standards.

Which terminal is right for my site?

Nano

100 Mbps download

Up to 100 Mbps download.
Powerful connectivity on the go.

Best for: Smaller remote locations, mobility and IoT use cases requiring limited bandwidth.

Pro

400 Mbps download

Up to 400 Mbps download. Compacted. Weather tested. High-performance internet for enterprise.

Best for: Construction sites, distribution depots, small businesses in rural areas, pop up or retail environments.

Ultra

1 Gbps download

Best-in-class speeds: Up to 1 Gbps download, 400 Mbps upload.

Best for: Enterprise-grade performance for demanding sites, large construction sites, multi-floor site offices, large logistics hubs.
